Medicated Inhalation.—Dr. S. S. Pitch's treatment for consumption and other diseases of the lungs. Its complete triumph.

To the Community of Invaline.—A theory of disease and of medical practice, however heautiful, cannot be of much interest to the invalid. What he wants is relief from his sufferings and the means of cure. One single fact which shows him that he can be cured, is worth more to the sufferer than whofe volumes of learned speculations and ingenious theorizing, that leave him where they found him, to struggle, and suffer, and die. Such facts I present in the following correspondence. I ask the consumptive to read these letters carefully, and then put the question to himself, whether he is not unwine to neglect or delay availing himself of a treatment so clearly demonstrated to be successful in the cure of positive, seated consumption? These letters are taken up almost a trandom, from the hundrest lying on my table, received from my patients in the course of regular correspondence, and written without solicitation. I press them upon the attention of consumptive, because I feel very desirous that they may be induced to adopt and employ a treatment which I know will be much less likely to disappoint their hopes of relief and cure than any other now any where practiced; and I do trust that such facts as these will not fail to influence the invalid who is looking for the means of relief from a disease so generally regarded as hopelessly fatal.

SOUTH NORWALK, CORD., May 19, 1856.

DR. S. FITCH: Dear Sir—For the benefit or thore suffering with disease of the lungs, I wish to make a statement of the effect of your irentment in my case. It is also an act of justice towards yourself. I will first say that my family is a consumptive one. My father and one sistor died of this disease. My own lungs have always been week, and I svidently inhorit a predipposition to consumption. Last autumn I was taken with a severe cough, which was induced by a cold. It made rapid progress, and soon the lungs became extensively diseased. In about four weeks I commenced bleeding from the lungs, and in the course of three months, I bled twelve times, some two or three table spoonfuls at a time. I became much emacisted, and very weak. My friends regarded my case as perfectly hoppless. In Becember, I had an ulcer break in my lungs, and discourage a full haif pint of heavy thick matter. My cough was distressing; I had severe night sweats; I suffered much pain through the chost and under the shoulder blaise; in short, I had every symptom of confirmed consumption. I applied to you, in January last, in this condition. You examined me, as you may recollest, and found the fronts of both lungs extensively ulcerated, and also a large cavity in the left lung. Still, you encouraged me to hope that I might be cured, though it seemed like hoping against hope. I immediately placed myself in your hands. You ave me your remedies—shoulder braces, supporter, inhaling tube, with medicines; alse, inhaler and inhaling find for medicated inhalation. My cough two on showed signs of improvement—It lost its dry, hard, distressing character, and become easy and loose, while it gradually became less and less. I had but one turn of bleeting after commencing the use of your remedies, and that but slight. My strength and flesh came base, the cheet expanded, the lungs enlarged and
